1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Larry J. Prescott on 1/27/05.

The application has been amended as follows:

Claim 16, line 4, change "determining" to --reading--.

Claim 20, line 1, change "determining" to --reading--.

Claim 26, line 3, after "transistor", insert --circuit--.

2. The following is an examiner's statement of reasons for allowance: The first major difference in the claims not found in the prior art of record is a method comprising: resetting the potential between said P well and said substrate during a reset period wherein a tunneling current between said P well and said floating gate resets the potential of said floating gate; accumulating charge at the PN junction between said P type silicon substrate and said N well during a charge integration period, thereby changing the potential of said N well, said P well, and said floating gate and wherein said charge integration period follows said reset period; and reading the potential of said floating gate after said charge integration period has been completed. The second major difference in the claims not found in the prior art of record is a method comprising:

resetting the potential between said N well and said substrate during a reset period wherein a tunneling current between said N well and said floating gate resets the potential of said floating gate; accumulating charge at the PN junction between said N type silicon substrate and said P well during a charge integration period, thereby changing the potential of said P well, said N well, and said floating gate and wherein said charge integration period follows said reset period; and reading the potential of said floating gate after said charge integration period has been completed. The third major difference in the claims not found in the prior art of record is the means for reading the potential of said floating gate, wherein the only electrical connection to said floating gate is to connect said floating gate to said means for reading the potential of said floating gate. The fourth major difference in the claims not found in the prior art of record is the means for determining the potential of said floating gate, wherein the only electrical connection to said floating gate is to connect said floating gate to said means for determining the potential of said floating gate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
